## WORK EXPERIENCE

**13/01/2021 – 21/05/2021** – Ljubljana, Slovenia

### Computer hardware repairman

University Medical Center

I went to practice at the University Clinical Center of Ljubljana for half a year. There I met new things, a lot of new things and a lot of new experiences. I worked in the service center of the clinical center and it was really nice. We maintained the hardware as well as the software of the entire clinical center. We set up a network where it was needed and we all learned some new things together. On the way to some goal, we encountered problems that we always pursued as a group. There I assembled computers for different uses, replaced computer components, installed various programs, and learned a lot of new things about networks.

## EDUCATION AND TRAINING

**01/09/2018 – 24/06/2022** – Litostrojska cesta 51, Ljubljana, Slovenia

### Completed 5 years of education

Secondary school of technical professions ŠIŠKA

<http://ssts.si/>

Struga, North Macedonia

### Completed 9 years of elementary school

Primary school "Braka Miladinovci"

## LANGUAGE SKILLS

## HOBBIES AND INTERESTS

### Architecture & design

Architecture is both the process and the product of [planning](#), [designing](#), and [constructing buildings](#) or other [structures](#). When I was maybe 10 years old I always would get a blank paper and a pencil and start drawing floorplans and even the furniture that goes into individual rooms. I always have. Even though I am studying IT i always have passion to do something for architecture and play with it. I always wanted to do modern interiors and modern houses because I personally think that is what I am good at. In my free time i like to do some architecture stuff and spend a lot of time with IT also.

I started using program called AutoCad for doing that architecture work but I must agree that I am not a professional at it, but I will try my best to get better because that is what I would love to do besides IT.

## COMPUTER SKILLS

### Personal computer hardware and software components.

I get to know all the computer components that build one personal computer. I know how to upgrade my computer to make it work more reliably and efficiently and without any problems.

I also know and know how to install some basic programs such as Microsoft Office for office work, Audacity, AutoCAD, Adobe Photoshop, Adobe Lightroom and many more.

### Operating Systems

I have a long knowledge and experience about the operating systems that are the basis of one computer.

I know how to use and install different operating systems like Windows 7, Windows 8 and Windows 10. Of all of them, I highly recommend the Windows 10 operating system because at least for me it is easier to use.

I would like to play and learn more about the new Windows 11 operating system and the MacOS used in Apple products.

### Network

During my training, I learned a lot more about computer networks and how it all works.

I can set up and connect the most basic home network in one apartment or house. This includes choosing the right components, choosing the right router, type of cable, type of connectors, and more.

I already have experience with the configuration of the router and the ability to play with different settings of it.

## ADDITIONAL INFORMATION

### Driving licence

### 6 year English language course

I attended a 6 year English language course in Macedonia. It helped me a lot in primary education and beyond, such as communicating abroad or talking to foreigners.
